

## A Note from Our Director

At Mobitech, every new step comes from a simple idea – to make technology work better for people and the planet.

We're happy to share that we're now moving into Large Water Management Systems. This is a big step for us, one that allows our experience in smart irrigation and

automation to make an even greater difference – not just in farms, but in large communities and projects where every drop counts.

Our journey grows stronger with every hand and heart that supports it – thank you all

Sunlight takes about 8 minutes and 20 seconds to reach Earth.

## Tips & Insights

### Activate Time-Based Irrigation

Schedule irrigation based on crop needs – no need to travel daily.

### Use the Right Amount of Water

Automation avoids over-watering and saves water. Even half the usual quantity may be enough with proper timing.

### Monitor with Real-Time Data

Instant alerts during power cuts or system errors help avoid damage and crop loss.

## Farmer Spotlight – Testimonial

This month, we feature Mr. Abdul from Trichy District, a farmer who transformed his daily routine with Mobitech's Smart Irrigation Automation.

Earlier, I had to travel 21 km every day just to water my farm. It was tiring and stressful, and I couldn't control water properly. For five years, I struggled without enough water, and many plants dried.

After installing the Mobitech Irrigation Automation system, everything became easier. Watering now happens on time, even when I'm not at the farm.

Water usage has reduced. Earlier, even two tank loads were not enough – now one load is enough for my entire farm.

## Efficient Water Use and Easy Farm Management

I now feel completely at ease because the system manages irrigation accurately and on time. Even if I visit the farm after 10 days, everything continues to run smoothly.

I am very satisfied with this solution. It has saved time, reduced my workload, and improved the health of my crops.

The automatic watering system has made farm management stress-free. Irrigation happens consistently with accurate control, and the system operates reliably even without constant monitoring or my physical presence

## Faster Starts, Stronger Teams

In 2010, when Mobitech Wireless Solution was just beginning, Mr. P. Dhanasekaran joined as our very first employee. From those early days of building processes from scratch to guiding teams through every milestone, he has been a steady pillar of growth.

Today, as our General Manager, his leadership, dedication, and belief in Mobitech's vision continue to inspire us. His journey reflects the true spirit of commitment and the foundation on which our company stands. Thank you, Mr. Dhanasekaran, for growing with us from day one.
