mobitech wireless solution

Issue 005 31 December 2025

A Note from Our Director

At Mobitech, our core philosophy has always been to simplify advanced technology and transform it into practical, real-world solutions that are easy to use and deliver meaningful results.

As we close out this month, I am pleased to share two major strategic developments that mark an exciting new chapter in our journey toward agricultural and environmental excellence.

We are simultaneously advancing our signature wireless irrigation automation for agriculture while implementing large water management systems for industrial projects.These initiatives reflect our commitment to innovation, efficiency, and sustainable resource management.

Did you know?

Trees can "talk" to each other through underground fungi, sending nutrients and warning signals when danger is near

Tips & Insights

Mobile-Controlled Operations

Control motors and valves from anytime, anywhere.

Efficient Farm Management

With drip irrigation automation, crops are now managed efficiently while conserving water

Real-Time Motor & Valve Monitoring

Check motor and valve status instantly, monitor logs in real time, and receive notifications if the power is on or off.

Farmer Spotlight – Testimonial

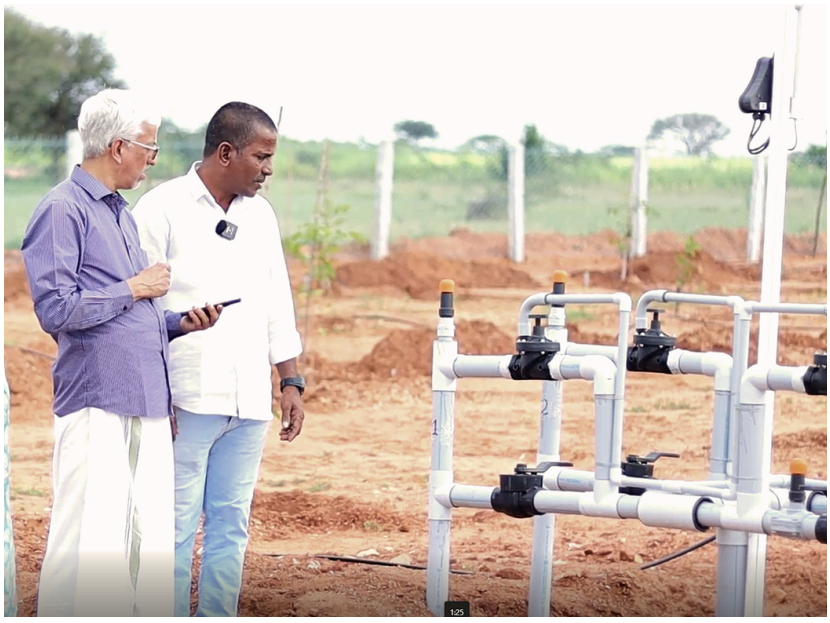

This month's feature highlights Mrs. Sreelekha Giri, who shares her real-life farming journey and experience with automated irrigation

Earlier, We had limited water, and managing irrigation manually was very difficult.It was hard to control motors and supply water evenly across the farm

Since adopting Mobitech solutions, irrigation has become easier and more reliable. Manual work has reduced significantly, minimizing the need for constant monitoring. Motor operations are now safer and more consistent, while water is distributed evenly across the farm without wastage

IRRIGATION AUTOMATION

Farming is now much easier & more efficient with automation

We expanded our farm to 22 acres, but managing water was tough. With drip irrigation and Mobitech automation, we can easily water over 15 acres without wasting water. The automated borewells and mobile-controlled system make everything simple, and now nearly 300 trees get water on time. It has really reduced our work and helps us farm sustainably

Today, we can control irrigation with automation anytime and anywhere. It makes watering our farm simple, fast, and efficient

Building Our Strong Finances

Mr. Santhosh joined our company in 2016 as the sole accountant, managing all financial work and company turnovers with dedication and accuracy. Over the years, his strong commitment and deep understanding of accounts helped build a solid financial foundation for the organization.

Today, Mr. Santhosh leads a well-structured accounts team and manages the department efficiently. Known for his supportive nature and positive attitude, he guides team members and encourages teamwork. His consistent efforts and leadership continue to play an important role in the company's success.
