A Note from Our Director

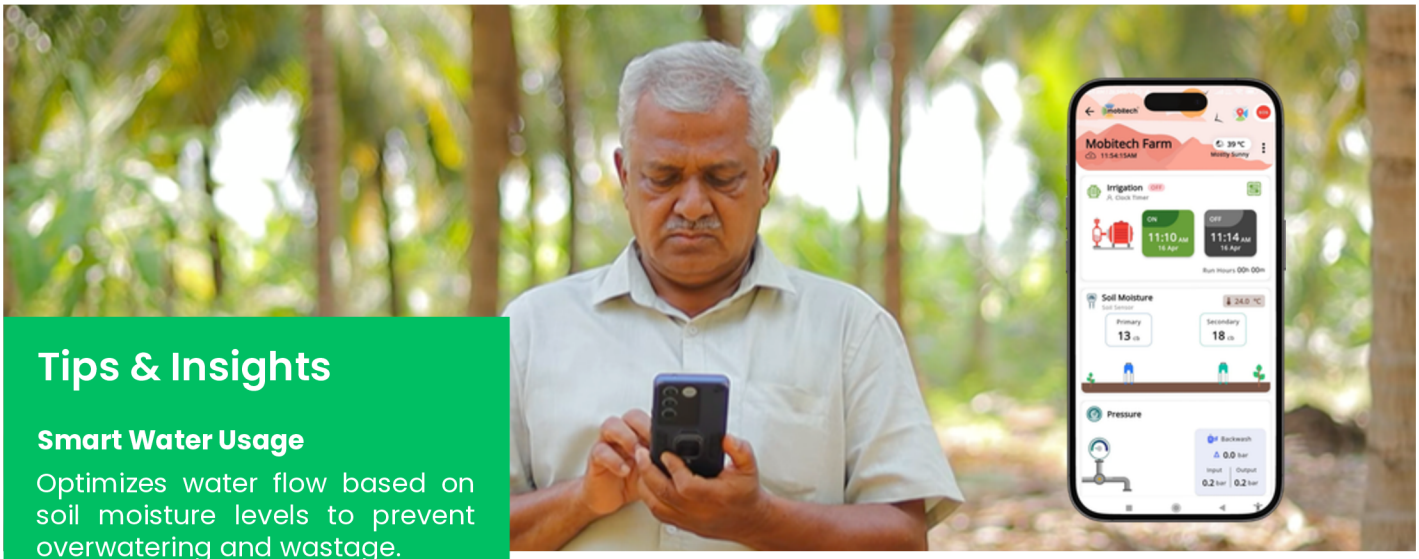

As we begin our 17th year, Mobitech Wireless Solution proudly continues its strong partnership with farmers, irrigation solutions, and community-focused water management initiatives.
Our achievements are the result of true teamwork—driven by dedication, innovation, and commitment. Together, we've transformed ideas into reliable solutions that serve both industry and society.

Guided by our vision of a greener world, we remain committed to purposeful technology and sustainable agriculture and water management.
With our team's strength, we're confident of reaching greater heights. Thank you to everyone who has been part of this journey.

-Mr. Nallasivam (Director of R&D)

Did you know?

Bananas are naturally radioactive due to the presence of potassium-40.

Tips & Insights

Smart Water Usage

Optimizes water flow based on soil moisture levels to prevent overwatering and wastage.

Energy Efficient

Reduces electricity consumption by operating pumps only when required.

Real-Time Alerts

Get instant notifications on system performance, water levels, or faults—so you can take action anytime, from anywhere.

Farmer Spotlight – Testimonial

For the past 20 years, this dedicated farmer has been cultivating 10 acres of land in Pongalur village, Avinashi, Tiruppur district.

Growing water-intensive crops like coconut, banana, and arecanut, irrigation has always been a critical part of daily operations. Earlier, managing water meant long nights in the field.

Due to low daytime voltage, irrigation had to be done at night — often requiring 2–3 hours of manual work, even crossing snakes while changing gate valves. It was tiring and risky.

Today, automation has transformed the farm. With Mobitech automation installed, irrigation can now be controlled easily.

IRRIGATION AUTOMATION

Growing More Than Crops; Growing Community

The system turns the motor on and off automatically — all that's needed is to set the valve and rest. Voltage updates are available on the mobile phone, making it simple to monitor and manage water flow anytime.
This shift has reduced water wastage, improved efficiency, and ensured cleaner irrigation for healthier crops. The farmer reports better yields and a smoother farming experience overall.

Mobitech completed the installation within 10 days, and the system has been working reliably with excellent service support.

Commander of Cost & Quality

In every growing organization, there is someone who works behind the scenes to keep operations strong and stable. As our Purchase Manager, he plays that crucial role with dedication and precision.

Today, he is not just managing purchases — he is contributing strategically to the company's growth and long-term success. His leadership, consistency, and results-driven mindset make him a key pillar of our organization.

"Strong procurement builds strong foundations — when we plan smart, we grow stronger."
