

A Note from Our Director

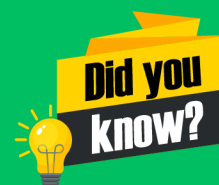

This month, we successfully conducted Neer Kaapom 2nd Edition at Anthiyur, bringing together farmers to explore smarter irrigation and water management practices.

Next month, we are excited to participate in Agri Intex 2026, one of South India's largest agricultural expos. We look forward to showcasing our latest innovations

and connecting with farmers from across the region.

At Mobitech, our commitment remains the same—empowering farmers through smart and sustainable agricultural solutions.

–Mr. Rajkumaran (Director of Sales & Marketing)

Potatoes were the first vegetable grown in space.

Tips & Insights

Consistent Crop Quality

Uniform feeding ensures better size, color, and quality across crops.

Healthy Root Development

Direct nutrient delivery to the root zone encourages stronger and deeper roots.

Time Efficient Farming

Automation reduces manual work and allows farmers to manage fields more efficiently.

Farmer Spotlight – Testimonial

This success story comes from a 2.83-acre farm in Sayalkudi, Ramanathapuram, where modern irrigation technology has transformed farm management.

The farm owner resides in Chennai, while his brother, Mr. Sakaya Velraj, oversees the day-to-day activities on the farm. Previously, irrigation was carried out manually once or

twice a week, requiring significant labor and time.

To overcome these challenges, Mobitech designed and installed a customized automated irrigation system along with a newly planned pipeline network. Considering the farm's soil conditions and water requirements, the system was engineered to

300 KM Away, Fully Connected

ensure efficient water distribution across all sections of the farm.

Today, the entire irrigation process is managed remotely from Chennai. The farm is equipped with 23 automated valves, allowing irrigation zones to operate according to a scheduled sequence.

"Now I can manage irrigation from anywhere, saving both time and labor."

Where Quality Begins

The Quality Testing Team is one of the most important pillars of our production process.

Their dedication to inspection, testing, and quality assurance ensures that every product meets our performance and reliability standards.

By identifying and resolving issues before products reach customers, they play a vital role in maintaining the trust, quality, and reputation of the Mobitech brand.
