A Note from Our Director

As we look back on this month, I'm proud of the progress our team has made in advancing smarter, more reliable irrigation solutions. Automation is helping growers use water more efficiently, respond to changing field conditions, and manage irrigation with greater confidence.

Our focus remains on building dependable products and providing the service our customers need to get the most from their systems.

Thank you to our employees, customers, dealers, and partners for your continued trust and collaboration. We look forward to helping more growers make every drop count.

-Mr. Nallasivam
(Director of Research & Development)

Did you know?

Honey never spoils. 3,000-year-old honey found in ancient Egyptian tombs is still edible!

Tips & Insights

Optimize Irrigation Timing
Schedule watering during early morning or late evening hours to minimize water evaporation caused by heat and wind.

Test Soil Moisture Regularly
Use soil moisture sensors or manual soil sampling before watering to prevent both over-watering and root damage from under-watering.

Inspect and Clean Filters
Periodically clean drip line filters and clear clogged emitters to maintain steady flow rates and prevent system blockages.

Farmer Spotlight – Testimonial

Ajith, a farmer from Anuthamatti village, Cumbum, Theni, adopted Mobitech's Dcon Ag AIR Automation to overcome labour shortages and manage irrigation efficiently across his farmland.

With a single controller operating 10 valves through one motor, he now schedules four pre-programmed irrigation cycles, ensuring timely and uniform water distribution. The system also monitors dry-run conditions and voltage fluctuations, helping protect motors from potential damage.

Earlier, managing valves at midnight and depending on labour was a major challenge.

IRRIGATION AUTOMATION

Less Labour, Smarter Irrigation, Complete Control!

Today, irrigation is automated, and farm visits are mainly needed during harvesting. Six months ago, he installed Mobitech's DCON Ag AIR automation system.

"Mobitech Automation has reduced our labour dependency and made irrigation management much easier. We are planning to extend automation to more motors and valves across our farmland."

THE POWER BEHIND EXCEPTIONAL SERVICE

A team that turns challenges into solutions and commitments into customer satisfaction!

Our Service Team stands out for its dedication, technical expertise, teamwork, and never-give-up attitude. Their hard work and passion for delivering excellence make them a true pillar of Mobitech.

Your dedication keeps us moving forward. Keep shining, Team Service!
